INTRODUCTION

Platts' methodologies are designed to produce price assessments that are representative of market value, and of the particular markets to which they relate. Methodology documents describe the specifications for various products reflected by Platts' assessments and indexes, the processes and standards Platts adheres to in collecting data, and the methods by which Platts arrives at final values for publication. These guides are freely available on Platts' website for public review.

Platts discloses publicly the days of publication for its price assessments and indexes, and the times during each trading day in which Platts considers transactions in determining its assessments and index levels. This schedule of publication is available on Platts' website, at the following link: <http://www.platts.com/HolidayHome>.

The dates of publication and the assessment periods are subject to change in the event of outside circumstances that affect Platts' ability to adhere to its normal publication schedule. Such circumstances include network outages, power failures, acts of terrorism and other situations that result in an interruption in Platts' operations at one or more of its worldwide offices. In the event that any such circumstance occurs, Platts will endeavor, whenever feasible, to communicate publicly any changes to its publication schedule and assessment periods, with as much advance notice as possible.

All Platts methodologies reflect Platts' commitment to maintaining best practices in price reporting.

Platts' methodologies have evolved to reflect changing market conditions through time, and will continue to evolve as markets change. A revision history, a cumulative summary of changes to this and future updates, is included at the end of the methodology.

How this methodology statement is organized

This description of methodology for indexes and assessments is divided into seven major parts (I-VII) that parallel the entire process of producing price values for the specified market period (daily or monthly).

- Part I describes what goes into Platts indexes and price values, including details on what data market participants are expected to submit, the process for submitting data and criteria for timeliness of market data submissions.
- Part II describes any security and confidentiality practices that Platts uses in handling and treating data, including the separation between Platts price reporting and its news reporting.
- Part III is a detailed account of how Platts collects market data, and what Platts does with the data to formulate its indexes and assessments. It includes descriptions of the methods that Platts uses for reviewing data, and the methods used to convert raw data into indexes and assessments, including the procedures used to identify anomalous data. This section describes how and when judgment is applied in this process, the basis upon which transaction data may be excluded from an index, and the relative importance assigned to each criterion used in forming the price assessment. This section describes the minimum amount of transaction data required for a particular price assessment to be published, and the criteria for determining which values are indexes, and which are assessments, based on reported transactions and other market information.
- Part IV explains the process for verifying that published prices comply with Platts' standards.
- Part V lays out the verification and correction process for revising published prices and the criteria Platts uses to determine when it publishes a correction.

- Part VI explains how users of Platts assessments and indexes can contact Platts for clarification of data that has been published, or to register a complaint. It also describes how to find out more about Platts' complaint policies.
- Part VII is a list of detailed specifications for the trading locations for which Platts publishes indexes or assessments in this commodity.

PART I: DATA QUALITY AND DATA SUBMISSION

Platts' objective is to ensure that the submission of transactional information and other data inputs that editors use as the basis for their price index and assessments is of the highest quality to ensure maintaining the integrity of Platts' various price assessment processes.

Platts encourages entities that submit any market data for consideration in its assessment processes to submit all market data that they have which may be relevant to the assessment being made. Under price reporting guidelines issued by the US Federal Energy Regulatory Commission in 2003, which apply to US natural gas markets, companies should report each bilateral, arm's-length transaction between non-affiliated companies in the physical markets at all trading locations. Platts expects reported data to include all transactions done by the entity at all locations reported by Platts, not a selective subset of those locations.

In North American gas markets, Platts establishes reporting relationships with market participants in which data is submitted from a central point in the mid- or back office (a segment of the reporting entity that does not have a commercial interest in the reported prices). We expect that a reporting entity is making a good-faith effort to report completely and accurately and will have staff assigned to respond to questions concerning data submittals. The entity also is obligated to make reasonable efforts to inform Platts of any errors or omissions. Daily and monthly

bidweek price indexes do not incorporate prices from publicly available price surveys.

What to report

For final daily indices for Platts locations, report each business day all physical fixed-price deals completed prior to the industry nomination deadline (1 pm Central Prevailing Time) for next-day pipeline delivery in North America. Transactions done on Friday usually are for flow on Saturday, Sunday and Monday inclusive. Trading patterns may vary in the case of holidays or when the end of a month occurs on a weekend.

For preliminary and final monthly indices for Platts locations, report all physical fixed-price deals negotiated that day for delivery throughout the next month. Also report all physical basis deals in which the basis value is negotiated on any bidweek day prior to and including the day the near-month NYMEX gas futures contract settles and the price is set by the final settlement value of the NYMEX Henry Hub contract plus or minus the negotiated basis. Platts' uses physical basis deals for points east of the Rocky Mountains, except in the Permian Basin region at Waha, El Paso Natural Gas Co., Permian Basin and Transwestern Pipeline Co., Permian Basin.

Price reports should be for deliveries into the pipeline, on a dry basis, and should specify the price point. Platts also requests trades for locations where it does not currently publish indexes or assessments. For those locations, use either the point's common name or the pipeline and meter designation. If sufficient trading develops at a location and is sustained, Platts would consider adding that pricing point to its listed points. In addition, information on deals at those locations adds to Platts' understanding of the market.

All transactions should be listed individually. In addition to the delivery point, specify the price (\$/MMBtu or, for some Canadian transactions, C\$/gigajoule), volume (MMBtu/day or gigajoule/day), source (company name), buy/sell indicator, trade date, start flow

date, end flow date, counterparty name and intermediary name (broker or trading platform). Platts accepts and uses data that does not include counterparty information. However, Platts firmly believes that counterparty data is the single best way to verify reported transactions and encourages market participants to report them.

For both the daily and monthly indices, Platts' policy is not to include so-called linked or prearranged spread trades between two parties. These trades are concluded as one leg of a transaction linked to a similar trade in another location. They are excluded because the two counterparties are transacting based on the difference between the two linked transactions rather than on the outright values at the locations. Again, Platts encourages companies to report these transactions, provided they are clearly labeled as one arm of a linked, spread transaction, in order for market editors to better understand market-value relationships, as well as to consider new benchmarks for the marketplace.

Platts requests daily time stamps indicating when a transaction was made because they provide a clearer picture of the movement of prices through the trading period and provide another tool for evaluating data quality. However, Platts understands that some market participants are currently unable to provide time stamps because deals are entered into trading systems in bulk after trading is completed rather than as each transaction occurs.

In the event that a data provider has no trade information to submit, a notification stating that fact should be sent.

How to report

Reports should be compiled and sent to Platts by a non-commercial department of the company. Even in the case of small entities, FERC's standards state that prices should be provided by individuals "separate from trading activities" such as accounting or bookkeeping staff.

Price reporters should email trades in Excel or CSV format to gasprice_daily@platts.com and gasprice_daily2@platts.com for

daily trades and gasprice_monthly@platts.com and gasprice_monthly2@platts.com for monthly trades.

The daily reporting deadline is 3:00 pm CPT. The monthly reporting deadline is 3:00 pm CPT on the first four days of bidweek and 2:00 pm CPT on the final day of bidweek. Price reporters need to provide Platts with at least two contacts responsible for submissions who can answer questions about reported transactions. If a price reporter is unable to submit trade data by the submission deadline, it should notify Platts as soon as possible.

PART II: SECURITY AND CONFIDENTIALITY

In the North American gas market, market participants are expected to submit all transactions for each day's or each month's trading. Platts is willing to sign confidentiality agreements providing for non-disclosure of submitted data except in circumstances where it is legally required to disclose the data.

Price data is e-mailed to specific Platts e-mail addresses and enters a secure network where it is accessible only by the Natural Gas Pricing team and designated administrators. Encryption is available upon request by the reporting company. Data is stored in a secure network, in accordance with Platts' policies and procedures. Transaction-level price data is used only for constructing indexes and assessments. Platts does not use price data from an individual source for news reporting purposes, and Platts news reporters do not have access to individual entities' transaction reports. Data aggregated from all reporting sources – e.g., changes in prices and trading volumes over time – may be used as the basis for news stories.

PART III: CALCULATING INDEXES AND MAKING ASSESSMENTS

The following section describes how Platts uses reported transactions and any other market information it has collected,

in the manner described in Part II, to formulate its price indexes and assessments.

Price assessment guidelines

As a publisher owned by S&P Global, Platts places independence and impartiality at the heart of its price assessments. Platts has no financial interest in the price of the products or commodities on which it reports. Platts' overall objective is to reflect the transactable value of the commodity assessed.

For North American gas, Platts publishes price assessments in two discrete markets: the day-ahead and the monthly bidweek markets. Platts' prices are available to any party who subscribes to the news or data services in which those prices are published. Platts' prices are copyrighted and may not be distributed or used for commercial gain by any third party without an explicit agreement with Platts.

To ensure the published data is as robust as possible, Platts editorial systems are backed by a strong corporate structure that includes managerial and compliance oversight.

Trading in the North American gas market is relatively standardized. Traded gas packages are for pipeline-quality dry gas, with Btu content and other specifications generally set by transporting pipelines' tariffs. Gas is processed to those specifications before it is injected into the pipeline grid, removing the need for any normalization of specifications between supplies of varying quality gas. Prices are reported in US dollars per million Btu (MMBtu), except in the case of some Canadian locations where the units of measure are Canadian dollars per gigajoule (Gj). Volumes are stated as MMBtu/day or Gj/day.

Daily market

For the daily market, Platts publishes three price components: the midpoint, the common range and the absolute range. The midpoint or index, commonly called the GDA (Gas Daily average), is the volume-

weighted average of all the transactions reported to Platts. The absolute range shows the absolute low and high of deals reported, excluding outliers that are not used (see section below on outliers). The common range is 50% of the absolute range and is built around the midpoint. Platts publishes prices to three decimal places for ranges and the midpoint, rounded to the nearest half-cent.

In the daily market, trading generally is done for gas to flow the next business day. Because gas volumes must be nominated to pipelines by 1 pm CT, the deadline established by the North American Energy Standards Board, to schedule next-day delivery, that time is the cutoff used by Platts for its daily gas survey. Gas typically trades on Friday for delivery Saturday, Sunday and Monday; in cases of three-day holiday weekends, trading typically covers the extra flow day. At times when the end of a month falls on a weekend, the normal flow sequence may change. For instance, if the last day of the month falls on Saturday, gas likely will trade on Thursday for flow Friday-Saturday and on Friday for flow Sunday-Monday. Platts publishes any variation to the normal data collection pattern in advance.

In the event of a Canadian holiday falling on a Monday, for daily gas indexes for Northwest, Can. Bdr. (Sumas) and Westcoast, station 2, deals done on the Friday trade date are usually for flow Saturday-Tuesday, depending on the observance of the holiday by trading companies. Indexes for those locations based on deals done on Friday for Saturday-Tuesday flow would be in publications dated Monday and would be repeated Tuesday.

Platts reports both trade date and flow date data. Platts also publishes weekly and monthly averages of the daily midpoints for each location, using flow date data.

A formula is used to calculate the common range for preliminary and final daily indices for Platts and ICE locations. In most markets, the formula establishes the common range at 50% of the absolute range and builds the range around the volume-weighted average price (the midpoint). A volume-weighted price located more toward either end of the range may narrow the range further, as explained below.

An example of a common range calculation: On a given day, the lowest price, or absolute low, reported at a point was \$4.70 and the high was \$4.92. The actual volume-weighted average was \$4.843. The calculation follows this sequence:

The volume-weighted average is rounded to the nearest half-cent, so \$4.843 becomes \$4.845 (the midpoint).

The width of the absolute range is calculated, so $\$4.92 - \$4.70 = \$0.22$; that figure is divided by 4, which produces an increment of .055.

That increment is subtracted and added to the rounded volume-weighted average to produce a common low and high; so, $\$4.845 - \$0.055 = \$4.79$, and $\$4.845 + \$0.055 = \$4.90$.

As part of its North American Natural Gas agreement with ICE, Platts publishes preliminary and final daily indices for Platts locations, as well as final daily indices for ICE locations. The methodology used to derive indices for Platts locations is different than ICE locations.

Preliminary Daily Indices For Platts Locations:

Platts publishes preliminary daily indices for Platts locations shortly after the 1:00 pm CPT market close. The only trade data used in these indices are ICE Exchange trades from ICE. Both the buy and sell side of ICE Exchange trades will be counted in the indices, regardless of whether the counterparties are Platts price reporters. The trades are not screened for outliers and Platts does not assess prices for locations with no trades.

Final Daily Indices For Platts Locations:

Platts publishes final daily indices for Platts locations around 5:00 pm CPT. Platts price reporter trades and non-Platts price reporter ICE Exchange trades are used in these indices.

Platts price reporter ICE trades are removed from the ICE trade data to eliminate double counting. Both the buy and sell side of ICE trades will be counted in the indices. For trades not done on

ICE, only the buy or sell side reported by the price reporter will be counted in the indices. The trades are screened for outliers using existing mechanisms as well as verifying trade data that occurs outside of the transparent trading range observed on the ICE exchange. At locations with robust trading activity, the index is the volume weighted average of all trades. However, the volume weighted average is not always an adequate indicator of trading activity. Therefore, in less liquid or highly volatile markets, Platts may look at other means of determining an index price, which could include but is not limited to the median and average of the median and volume weighted average. Platts makes every effort to assess prices for locations with no trades. Platts will examine other market information to determine whether it can publish an assessment. These assessments are clearly designated by asterisks in price tables and include an assessment rationale that describes how the price was derived. Assessments are based on other market information, including but not limited to, an analysis of historical daily prices, locational spread relationships to values at related liquid pricing points, non-Platts price reporter matched eConfirm trades, and ICE physical bids and offers. If that is not possible, Platts will publish no price for the day.

Final Daily Indices For ICE Locations:

Platts publishes daily indices for ICE locations once each day at the same time that preliminary daily indices for Platts locations are published, or shortly after the 1:00 pm CPT market close. The only trade data used in these indices are ICE Exchange trades from ICE. Both the buy and sell side of ICE Exchange trades are counted in the indices, regardless of whether the counterparties are Platts price reporters. The trades are not screened for outliers and Platts does not assess prices for locations with no trades.

Monthly market

In the monthly market, gas is priced for flow on each day of the month at specified volumes. Transaction data is collected for the last five business days of the month, commonly referred to as bidweek, and Platts prices are published on the first business

day of the month in which the gas will flow. The monthly prices comprise a range of reported trades, excluding outliers, and either an index or an assessment. Platts publishes two price components: the index and the absolute range. The index is the volume-weighted average of all the transactions reported to Platts that are used to calculate the index for each point. The absolute range shows the absolute low and high of deals reported, excluding outliers that are not used (see section below on outliers). Platts publishes fixed prices to two decimal places and basis prices to three decimal places.

Unlike the daily market, where Platts uses only fixed-price transactions, in the monthly market Platts uses physical basis transactions in addition to fixed-price transactions at certain locations. In those basis transactions, the basis value is negotiated on any bidweek day prior to and including the day the near-month NYMEX gas futures contract settles and the price is set by the final settlement value of the NYMEX contract plus or minus the negotiated basis. The NYMEX futures contract expires on the third-to-last business day of the month. Currently, Platts uses physical basis transactions for price locations east of the Rocky Mountains, except in the Permian Basin region at Waha, El Paso Natural Gas Co., Permian Basin and Transwestern Pipeline Co., Permian Basin.

As part of its North American Natural Gas agreement with ICE, Platts publishes preliminary and final monthly indices for Platts and ICE locations. The methodology used to derive indices for Platts locations is different than ICE locations.

Preliminary Monthly Indices for Platts Locations:

Platts publishes preliminary monthly indices for Platts locations at the end of each day during bidweek. Platts price reporter trades not done on ICE and ICE Exchange trades received from ICE are used in these preliminary monthly indices. Both the buy and sell side of ICE Exchange trades from ICE will be counted in the indices, regardless of whether the counterparties are Platts price reporters. ICE Exchange trades will be sourced from ICE since most price reporter trade data

is not submitted until the last day of bidweek. The duplicate ICE trade will be removed from the price reporter data. For price reporter trades not done on ICE, only the buy or sell side reported by the price reporter will be counted. In addition, Platts will screen for outlying data using existing mechanisms as well as verifying trade data that occurs outside of the transparent trading range observed on the ICE exchange. Platts does not assess prices for locations with no trades.

Preliminary Monthly Indices For ICE Locations:

Platts publishes preliminary monthly indices for ICE locations at the same time as the preliminary monthly indices for Platts locations. The only trade data used in these indices are ICE Exchange trades from ICE. Both the buy and sell side of ICE Exchange trades are counted in the indices, regardless of whether the counterparties are Platts price reporters. The trades are not screened for outliers and Platts does not assess prices for locations with no trades.

Final Monthly Indices For Platts Locations:

Platts publishes final monthly indices for Platts locations around noon on the first business day of the month. Platts price reporter trades and non-Platts price reporter ICE Exchange trades are used in these final indices.

Platts price reporter ICE trades are removed from the ICE trade data to eliminate double counting. Both the buy and sell side of ICE trades will be counted in the indices. For trades not done on ICE, only the buy or sell side reported by the price reporter will be counted in the indices. Platts screens for outlying data using existing mechanisms as well as verifying trade data that occurs outside of the transparent trading range observed on the ICE exchange. At locations with robust trading activity, the index is the volume weighted average of all trades. However, the volume weighted average is not always an adequate indicator of trading activity. Therefore, in less liquid or highly volatile markets, Platts may look at other means of determining an index price, which could include but is not limited to the median and average of the median and volume weighted average. Platts makes every effort

to assess prices for locations with no trades. Platts will examine other market information to determine whether it can publish an assessment. These assessments are clearly designated by asterisks in price tables and include an assessment rationale that describes how the price was derived. Assessments are based on other market information, including but not limited to, an analysis of historical bidweek prices, locational spread relationships to values at related liquid pricing points, non-Platts price reporter matched eConfirm trades, ICE physical bids and offers during bidweek, implied physical values derived from financial swaps and derivative index deals, and daily market trading at the point during bidweek. If that is not possible, Platts will publish no price for the month.

Final Monthly Indices For ICE Locations:

Platts publishes monthly indices for ICE locations at the same time as the final monthly indices for Platts locations. The only trade data used in these indices are ICE Exchange trades from ICE. Both the buy and sell side of ICE Exchange trades are counted in the indices, regardless of whether the counterparties are Platts price reporters. The trades are not screened for outliers and Platts does not assess prices for locations with no trades.

To enhance market transparency, Platts publishes the volumes and number of transactions at each trading point in the daily and monthly price surveys. To provide a broad overview of market liquidity, Platts groups Platts locations in the final monthly survey into three tiers: tier 1, points with volumes of at least 100,000 MMBtu/day and at least 10 trades; tier 2, volumes of 25,000 to 99,999 MMBtu/day and at least five trades; and tier 3, points with volumes below 25,000 MMBtu/day and/or fewer than five trades. Volumes, deal counts, and tier level for all monthly survey locations are published in the Liquidity in North American Monthly Gas Markets table found at <http://www.platts.com/methodology-specifications/natural-gas>.

Platts also publishes the physical basis prices that are incorporated into the overall monthly market indexes and

ranges. The physical basis data shows the volume, deal count, low price, high price, average price, and cash equivalent price for each location at which physical basis deals are reported.

Outliers

Platts analyses reported transactions in order to identify potential anomalous data that may be excluded from formulating an index. This analysis includes a comparison of the trade price with bid, offer, and transaction data on the ICE Exchange. Platts believes that ICE Exchange data represents transparent and market tested values. Therefore, trades outside of the ICE Exchange range will receive greater scrutiny. Other analysis includes, but is not limited to standard deviation from the mean, volume, and gaps in trade data. Platts editors will contact the reporting party for more specifics on the potential anomalous transaction.

Gaps in the market are not in themselves anomalous. They warrant closer analysis, and might not be reflected in our final published assessments, depending on the outcome of that further analysis. Examples of potentially anomalous data could include information that might be outside normal market practice, transactional data containing unusual contractual terms, information that is incomplete (lacking full confirmation, or important details), and/or information that otherwise deviates from our methodology.

Regional and national averages

Regional average prices are calculated in the daily and monthly markets. Each regional average price represents a straight average of the index prices at all hubs listed under a region, with exceptions in the Northeast, Upper Midwest and Rockies/Northwest sections.

In the Northeast, the Transco, Zone 6 non-NY North and Transco, Zone 6 non-NY South indexes are not included in the regional average because transactions at both locations are included in the Transco, Zone 6 Non-New York index. The Transco, zone

5 delivered North and Transco, zone 5 delivered South indexes are also not included because transactions at both locations are included in the Transco, zone 5 delivered index. In the Upper Midwest, the three Chicago sublistings of Chicago-Nicor, Chicago-NIPSCO and Chicago-Peoples are not included because transactions at those locations are also included in the Chicago city-gates average. In the Rockies/Northwest section, the prices at AECO and Westcoast, Station 2 are not included.

The national average price is a straight average of all published Platts pricing hubs, with the exceptions of the Transco, Zone 5 North and South sublistings, Transco, Zone 6 non-NY North and non-NY South sublistings, the Chicago sublistings, and the Western Canadian points AECO and Westcoast, Station 2.

PART IV: PLATTS EDITORIAL STANDARDS

All Platts employees must adhere to the S&P Global Code of Business Ethics (COBE), which has to be signed annually. The COBE reflects S&P Global's commitment to integrity, honesty and acting in good faith in all its dealings.

In addition, Platts requires that all employees attest annually that they do not have any personal relationships or personal financial interests that may influence or be perceived to influence or interfere with their ability to perform their jobs in an objective, impartial and effective manner.

Market reporters and editors are required to ensure adherence to published methodologies as well as internal standards that require accurate records are kept in order to document their work.

Platts has a Compliance function that is independent of the editorial group. Compliance is responsible for ensuring the quality and adherence to Platts' policies, standards, processes and procedures. The Compliance team conducts regular assessments of editorial operations, including checks for adherence to published methodologies.

S&P Global's internal auditor, an independent group that reports directly to the parent company's board of directors, reviews the Platts risk assessment programs.

PART V: CORRECTIONS

Platts is committed to promptly correcting any material errors. When corrections are made, they are limited to corrections to data that was available when the index or assessment was calculated.

Errors that data providers should report to Platts are limited to inaccuracies in the attributes (price, volume, location, etc.) at the time the transaction was done and reported to Platts, and do not include operationally driven, after-the-fact changes in the nature of the transaction. For instance, if an interruption in transmission service forces two counterparties to alter flows and delivery points, Platts does not consider those changes to be corrections so long as the price, volume, and location information originally reported to Platts accurately reflected those attributes at the time the trade was made and reported to Platts.

If Platts is notified of an error in a submission after a price is calculated and published, it will assess the impact of the error.

PART VI: REQUESTS FOR CLARIFICATIONS OF DATA AND COMPLAINTS

platts strives to provide critical information of the highest standards, to facilitate greater transparency and efficiency in physical commodity markets.

Platts customers raise questions about its methodologies and the approach taken in price assessments, proposed methodology changes and other editorial decisions in relation to Platts' price assessments. Platts strongly values these interactions and encourages dialogue concerning any questions a customer or market stakeholder may have.

However, Platts recognizes that occasionally customers may not be satisfied with responses received or the services provided by Platts and wish to escalate matters. Full information about how to contact Platts to request clarification around an assessment, or make a complaint, is available on the Platts website, at: <http://www.platts.com/ContactUs/Complaints>.

PART VII: DEFINITIONS OF THE TRADING LOCATIONS FOR WHICH PLATTS PUBLISHES DAILY AND MONTHLY INDEXES OR ASSESSMENTS

The following North American natural gas specifications guide contains the primary price point specifications for Platts natural gas assessments in North America. Prices are reported in US dollars per million Btu (MMBtu) except where, as noted, in Canadian dollars per gigajoule. All prices are for pipeline quality gas.

Price points common to both the daily and monthly surveys and any differences in daily and monthly pricing methodology are noted in the descriptions.

Points are listed alphabetically within eight regions: Northeast, Appalachia, Midcontinent, Upper Midwest, East Texas, Louisiana/Southeast, Rockies/Northwest, and Southwest. For the daily survey, symbols are listed for the common range (high, low, midpoint, volume), absolute range (high, low) and deal count for both the trade date and flow date(s); the weekly average and the monthly average. For the monthly survey, symbols are listed for bidweek prices (high, low, index, volume) and the deal count, and for physical basis transactions, the high, low, average, volume, deal count and cash equivalent price. Platts' current policy is to use physical basis transactions only at specified locations (see Part III). Basis symbols are not shown for locations where physical basis transactions are not used. Symbols also are listed for the location's tier in the monthly survey. For the Platts symbols in the table, the bases are: h = high; l = low; u = midpoint (daily); u = index (monthly); w = volume.

This methodology is current at the time of publication. Platts may issue further updates and enhancements to this methodology and will announce these to subscribers through its usual publications of record. A revision history, a cumulative summary of changes since January 2012, is included at the end of this section.

Northeast

Algonquin, city-gates (daily and monthly survey)

Deliveries from Algonquin Gas Transmission to all distributors and end-use facilities in Connecticut, Massachusetts and Rhode Island.

Algonquin, receipts (daily survey only)

Deliveries into Algonquin Gas Transmission from Texas Eastern Transmission at the Lambertville and Hanover, NJ, interconnects; from Transcontinental Gas Pipe Line at the Centerville, NJ, interconnect; from Columbia Gas Transmission at the Hanover, NJ, and Ramapo, NY, interconnects; from Millennium Pipeline at Ramapo, NY; from Tennessee Gas Pipeline at the Mahwah, NJ, Cheshire, CT., and Mendon, MA., interconnects; from Iroquois Gas Transmission System at the Brookfield, CT., interconnect; and from Maritimes & Northeast Pipeline at the Beverly, MA., interconnect.

Dracut, Mass. (daily survey only)

Deliveries into Tennessee Gas Pipeline at the Dracut interconnect with Maritimes & Northeast Pipeline near Middlesex, MA. Dracut also includes gas entering from Portland Natural Gas Transmission System.

Iroquois, receipts (daily and monthly survey)

Deliveries into Iroquois Gas Transmission System at the US-Canadian border at the Waddington interconnect with TransCanada PipeLines.

Iroquois, zone 2 (daily and monthly survey)

Deliveries from Iroquois Gas Transmission System starting at the Athens, NY, power plant downstream to the terminus of the pipeline at Hunts Point and South Commack.

Niagara (daily and monthly survey)

Cross-border deliveries to and from TransCanada

PipeLines and the Niagara spur and loop lines, a border-crossing point between eastern Canada and the northeastern United States, north of Niagara Falls, NY Niagara Spur Loop line and Niagara Spur line interconnects are with Tennessee Gas Pipeline, National Fuel Gas Supply, Dominion Transmission and Texas Eastern Transmission.

Tennessee, zone 6 delivered (daily and monthly survey)

Deliveries from Tennessee Gas Pipeline on the 200 leg in Connecticut, Massachusetts, Rhode Island and New Hampshire.

Tennessee, zone 6 (300 leg) delivered (daily)

Deliveries from Tennessee Gas Pipeline on 300 leg in Connecticut.

Texas Eastern, M-3 (daily and monthly survey)

Deliveries from Texas Eastern Transmission beginning at the outlet side of the Delmont compressor station in Westmoreland

County, PA, easterly to all points in the M3 market zone, except for deliveries to Transcontinental Gas Pipe Line at Lower Chanceford.

Transco, zone 5 delivered (daily and monthly survey)

Deliveries from Transcontinental Gas Pipe Line on the 30-inch, 36-inch and 42-inch lines from the Georgia-South Carolina border to the Virginia-Maryland border. Deliveries into Transco at the Pleasant Valley receipt point near Fairfax, VA, from Dominion's Cove Point LNG terminal are not included.

Transco, zone 5 delivered North (daily survey only)

Deliveries from Transcontinental Gas Pipe Line on the 30-inch, 36-inch and 42-inch lines north of Station 165 to the Virginia-Maryland border. Deliveries into Transco at the Pleasant Valley receipt point near Fairfax, VA, from Dominion's Cove Point LNG terminal are not included. Transactions are also included in the Transco, zone 5 delivered index.

Transco, zone 5 delivered South (daily and monthly survey)

Deliveries from Transcontinental Gas Pipe Line on the 30-inch, 36-inch and 42-inch lines from the Georgia-South Carolina border up to and including Station 165 in Virginia. Deliveries from Transco north of Station 165 are not included. Transactions are also included in the Transco, zone 5 delivered index.

Transco, zone 6 non-N.Y. (daily and monthly survey)

Deliveries from Transcontinental Gas Pipe Line from the start of zone 6 at the Virginia-Maryland border to the Linden, NJ, compressor station and on the 24-inch pipeline to the Wharton, PA, station. The non-New York point does not include deliveries to Public Service Electric and Gas in New Jersey, whose supply is taken downstream of Linden.

Transco, zone 6 non-N.Y. North (daily and monthly survey)

Deliveries from Transcontinental Gas Pipe Line from Station 195 in York, Pennsylvania, to the Linden, New Jersey, compressor station and on the Leidy Line south of Clinton County, Pennsylvania. The non-New York North point does not include deliveries to Public Service Electric and Gas in New Jersey, whose supply is taken downstream of Linden. Transactions are also included in the Transco, zone 6 non-NY index.

Transco, zone 6 non-N.Y. South (daily and monthly survey)

Deliveries from Transcontinental Gas Pipeline from the start of zone 6 at the Virginia-Maryland border to Station 195 in York, Pennsylvania. Transactions are also included in the Transco, zone 6 non-NY index.

Transco, zone 6 N.Y. (daily and monthly survey)

Deliveries from Transcontinental Gas Pipe Line at the end of zone 6 into city-gates downstream of Linden, NJ, for New York City area distributors.

Appalachia

Columbia Gas, Appalachia (daily and monthly survey)

Deliveries in Columbia Gas Transmission's Interruptible Paper Pool (IPP pool) from any source on Columbia Gas. Deliveries in the IPP pool, which is also known as the "TCO Pool" can originate from any source delivered into Columbia Gas' system.

Columbia Gas, Appalachia (Non-IPP) (daily and monthly survey)

Deliveries to Columbia Gas Transmission from on-system production locations that are restricted from Columbia's

IPP pool (TCO pool). This pricing location does not include transactions for gas delivered to Columbia from interconnects with other interstate pipeline systems.

Dominion, North Point (daily survey only)

Deliveries into Dominion Transmission starting at the Valley Gate delivery point at the end of Dominion's South Point system, about 40 miles northeast of Pittsburgh in Armstrong County, PA, and continuing north into New York and eastward across the state, crossing the Hudson River and terminating in Rensselaer County, near Albany, Troy and Schenectady, NY

Dominion, South Point (Dominion, Appalachia in monthly survey) (daily and monthly survey)

Deliveries into two Dominion Transmission main lines: One runs northeast from Warren County, Ohio, midway between Cincinnati and Dayton, and merges with the second line just northeast of Pittsburgh, PA. The second line runs from Buchanan County, VA, on the Virginia-West Virginia border north to the end of the zone at Valley Gate in Armstrong County, PA.

Lebanon Hub (daily and monthly survey)

Deliveries to or from Texas Gas Transmission, ANR Pipeline, Texas Eastern Transmission, Panhandle Eastern Pipe Line, Columbia Gas Transmission, Dominion Gas Transmission and Rockies Express Pipeline at interconnects in the Lebanon, OH, area.

Leidy Hub (daily and monthly survey)

Deliveries into and from Dominion Transmission, National Fuel Gas Supply, Columbia Gas Transmission, Texas Eastern Transmission and Transcontinental Gas Pipe Line in the vicinity of the Leidy storage facility in Clinton County, PA.

Millennium, East receipts (daily and monthly survey)

Receipts into Millennium Pipeline downstream of the Corning compressor station in Steuben County, NY, and upstream of the Ramapo interconnect with Algonquin Gas Transmission in Rockland County, NY

REX, Clarington, Ohio (daily and monthly survey)

Deliveries from Rockies Express Pipeline at Clarington in Monroe County, OH, to Dominion Transmission or Texas Eastern Transmission. Deliveries to the local distributor Dominion East Ohio are not included at this location.

Tennessee, zone 4-200 leg (daily and monthly survey)

Deliveries into Tennessee Gas Pipeline at all points of receipt on the 200 line in the states of Pennsylvania and Ohio as well as transactions at Tennessee's station 219 pool. This location does not include deliveries from Tennessee to other systems in zone 4.

Tennessee, zone 4-300 leg (daily and monthly survey)

Deliveries into Tennessee Gas Pipeline, zone 4-300 leg from, and including, station 315 in Tioga County, PA, to, and including, station 321 in Susquehanna County, PA.

Tennessee, zone 4-313 Pool (daily and monthly survey)

Transactions at Station 313 in Potter County, Pennsylvania, on Tennessee Gas Pipeline's Zone 4 300 Leg.

Tennessee, zone 4-Ohio (daily and monthly survey)

Deliveries to Tennessee Gas Pipeline from Rockies Express Pipeline in Guernsey and Muskingum counties in East Ohio.

Texas Eastern M-2, receipts (daily and monthly survey)

Receipts into Texas Eastern Transmission on its 24- and 30-inch lines in the pipeline's Market Zone 2, which extends on the 24-inch line from the Illinois-Indiana state line to the suction side of Bern compressor station in Lewisville, Ohio, and on the 30-inch line from the Tennessee-Kentucky state line to the suction side of Delmont station in Westmoreland County, PA, and to the discharge side of Station Site No. 22 in southwestern Pennsylvania. (This location does not include deliveries out of Texas Eastern, M-2.)

Transco, Leidy Line receipts (daily and monthly survey)

Receipts into Transcontinental Gas Pipe Line's Leidy Line downstream of the Leidy and Wharton storage facilities in Clinton and Potter counties, PA, to Transco's station 505 in Hunterdon County, NJ This pricing location does not include transactions at the storage-related interconnects with Dominion Transmission, National Fuel Gas Supply, UGI Storage or Tennessee Gas Pipeline.

Midcontinent**ANR, Okla. (daily and monthly survey)**

Deliveries into ANR Pipeline at the start of the Southwest mainline at the Custer, OK., compressor station, into the Texas Panhandle north to the Greensburg, KS, station.

Enable Gas, East (daily and monthly survey)

Deliveries into Enable Gas Transmission's flex/neutral and north pooling areas in northeastern Arkansas and southeastern Oklahoma. The north pooling area is separated from the south pooling area by a generally northwest-to-southeast line between Le Flore County, OK, and Bolivar County, MS. The flex (or neutral) pooling area in Oklahoma comprises all of Pushmataha, Latimer, Haskell

and Pittsburg counties and the northeast section of Atoka County.

NGPL, Amarillo receipt (daily survey only)

Deliveries into Natural Gas Pipeline Co. of America starting at the Trailblazer Pipeline interconnection in Gage County, NE, on the Amarillo mainline at compressor station 106 east to NGPL's interconnection with Northern Border Pipeline at station 109 in Keokuk County, IA.

NGPL, Midcontinent (daily and monthly survey)

Deliveries into Natural Gas Pipeline Co. of America starting at compressor station 155 in Wise County, TX, west to the Amarillo mainline at station 112 in Moore County in the Texas Panhandle, and then north to the Trailblazer Pipeline interconnection in Gage County, NE. Included are deliveries into NGPL at all Oklahoma points west of station 801, as well as those in North Texas north and east of station 170 and in Kansas south of station 103.

Oneok, Okla. (daily and monthly survey)

Deliveries into Oneok Gas Transportation's mainline systems from several gathering systems, all of which are located in Oklahoma. One of the two largest is near the east-central part of the state in Pittsburg and Haskell counties. The second, in the west-central part of the state, extends from Blaine and Canadian counties southeast to Grady County. Oneok operates a single price pool for all gas coming into the system.

Panhandle, Tx.-Okla. (daily and monthly survey)

Deliveries into Panhandle Eastern Pipe Line on two laterals running from the Texas and Oklahoma panhandles, southwestern Kansas and northwestern Oklahoma upstream of the Haven, KS, compressor station. Deliveries to Panhandle at the Haven pooling point — the demarcation between Panhandle's field and market zones — are not included.

Southern Star, Tx.-Okla.-Kan. (daily and monthly survey)

Deliveries into Southern Star Central Gas Pipeline's system from Hemphill County in the Texas Panhandle eastward, from Carter County in south-central Oklahoma northward and from Grant County in southwestern Kansas eastward.

Texas Eastern, M-1 24-inch (daily survey only)

Deliveries to Texas Eastern's 24-inch line downstream of the Little Rock, AR, compressor station to the Illinois-Indiana state line.

Upper Midwest**Alliance, into interstates (daily survey only)**

Deliveries from Alliance Pipeline into Vector Pipeline, Natural Gas Pipeline Co. of America, ANR Pipeline and Midwestern Gas Transmission at the tailgate of the Aux Sable plant in north-central Illinois at the terminus of Alliance. Deliveries into the Northern Indiana Public Service, Peoples Gas Light & Coke and Nicor Gas city-gates in the Chicago area are not included.

ANR, ML 7 (daily and monthly survey)

Deliveries into ANR Pipeline in its northern market zone starting at the Sandwich, IL, compressor station at the terminus of the Southwest mainline north through Wisconsin to the Crystal Falls, MI, interconnection with Great Lakes Gas Transmission. Also, deliveries into ANR east from Sandwich to the Defiance, Ohio, compressor station at the terminus of the Southeast mainline, and north from the Bridgman, MI., station to the Orient, MI, station.

Chicago city-gates (daily and monthly survey)

Deliveries into the Nicor Gas, Peoples Gas Light & Coke, North Shore Gas and Northern Indiana Public Service city-gates in the Chicago metropolitan area.

Chicago-Nicor (daily and monthly survey)

Deliveries into the Nicor Gas system in the Chicago metropolitan area. Transactions are also included in the Chicago city-gates index.

Chicago-NIPSCO (daily and monthly survey)

Deliveries into the Northern Indiana Public Service system in the Chicago metropolitan area. Transactions are also included in the Chicago city-gates index.

Chicago-Peoples (daily and monthly survey)

Deliveries into the Peoples Gas Light & Coke system in the Chicago metropolitan area. Transactions are also included in the Chicago city-gates index.

Consumers Energy city-gate (daily and monthly survey)

Deliveries into all city-gates of Consumers Energy, which serves most of central Michigan and the areas around Saginaw Bay.

Dawn, Ontario (daily and monthly survey)

Deliveries from Union Gas' Dawn Hub, a gathering point for 15 adjacent storage pools in Ontario near Port Huron, MI, on the US-Canadian border. Included are deliveries into TransCanada PipeLines at Kirkwall, Ontario; deliveries into Great Lakes Gas Transmission at St. Clair, MI; deliveries into Consumers Energy at Bluewater, MI; deliveries into Panhandle Eastern Pipe Line at Ojibway, MI; and deliveries into Dawn storage. Deliveries from Union into TransCanada at Parkway, Ontario, are not included.

Emerson, Viking GL (daily and monthly survey)

Deliveries into Great Lakes Gas Transmission from TransCanada PipeLines at the Emerson 2 meter station at the

US-Canadian border at Emerson, Manitoba, and deliveries into Viking Gas Transmission from TransCanada at the Emerson 1 station.

MichCon city-gate (daily and monthly survey)

Deliveries into all city-gates of Michigan Consolidated Gas, which serves the Detroit and Grand Rapids areas and much of north and northeast Michigan. The main MichCon city-gates are located at interconnects with ANR Pipeline at Willow Run and Wolkfork, MI, Panhandle Eastern Pipe Line at River Rouge, Great Lakes Gas Transmission at Belle River, Union Gas at St. Clair Pipeline and Consumers Energy at Northville. MichCon also receives in-state production at Kalkaska.

Northern Border, Ventura Transfer Point (daily and monthly survey)

Deliveries on Northern Border Pipeline at its Ventura Transfer point (DRN# 125771). This location is designed to capture gas traded on Northern Border at Ventura that is not traded for delivery to Northern Natural Gas at the Northern Natural/Northern Border Ventura interconnect (DRN#4680).

Northern, demarcation (daily and monthly survey)

Deliveries into Northern Natural Gas at the demarcation point between its production (field) and market zones, at the Clifton station in Clay County, KS.

Northern, Ventura (daily and monthly survey)

Deliveries to Northern Natural Gas at Ventura in Hancock County, IA.

REX, Zone 3 delivered (daily and monthly survey)

Deliveries from Rockies Express Pipeline to Natural Gas Pipeline Co. of America pipeline at the Moultrie County, IL interconnect; to

Midwestern Gas Transmission at the Edgar County, IL interconnect; to ANR Pipeline at the Shelby County, IN interconnect; to the Trunkline system at the Douglas County, IL interconnect; and to the Panhandle Eastern Pipe Line at the Putnam County, IN interconnect.

East Texas

Agua Dulce Hub (daily survey only)

Deliveries into Kinder Morgan Texas Pipelines, Houston Pipe Line, Gulf South Pipeline, Natural Gas Pipeline Co. of America, Transcontinental Gas Pipe Line, Tennessee Gas Pipeline, TransTexas Gas and Enterprise Texas pipeline at the Agua Dulce Hub in Nueces County, TX, about 20 miles west-southwest of Corpus Christi. Deliveries from the ExxonMobil King Ranch plant are included.

Carthage Hub (daily survey only)

Deliveries into Enable East, Gulf South Pipeline, Lone Star Pipeline, Southern Natural Gas, Kinder Morgan Texas Pipelines, Tennessee Gas Pipeline, Texas Eastern Transmission and Texas Gas Transmission at the tailgate of the Carthage, Texas, processing plant in Panola County, Texas.

Florida Gas, zone 1 (daily and monthly survey)

Deliveries into Florida Gas Transmission beginning at compressor station 2 in Nueces County in South Texas to station 7 in Acadia Parish, LA.

Houston Ship Channel (daily and monthly survey)

Deliveries to end-users and pipelines that serve them in the Houston Ship Channel region, an industrial area extending from the east side of Houston to Galveston Bay and northeastward to the Port Arthur-Beaumont area. Gas is delivered in this area by numerous pipelines, including Kinder Morgan Texas Pipeline,

Kinder Morgan Tejas Pipeline, Houston Pipe Line and Enterprise Texas pipeline.

Katy (daily and monthly survey)

Deliveries into Oasis Pipeline, Lone Star Pipeline, Houston Pipe Line and Kinder Morgan Texas Pipelines in the Katy, TX, area, including deliveries and receipts into and out of Katy storage.

NGPL, S. Texas (daily and monthly survey)

Deliveries into Natural Gas Pipeline Co. of America at the beginning of the mainline at the Thompsonville receipt point in Jim Hogg County, TX, north to compressor station 302 in Montgomery County, TX.

NGPL, Texok zone (daily and monthly survey)

Deliveries to Natural Gas Pipeline Co. of America in all areas of the Texok zone excluding the portion in Texas and Oklahoma on the A/G Line. Applicable to the Texok zone are deliveries to NGPL from the Louisiana-Texas border westward to compressor station 302 in Montgomery County, TX, and northward to the interconnect with the Gulf Coast Mainline receipt zone in Cass County, TX. The "Texok Gulf Coast Pooling Point" is included in this posting, but the "Texok A/G Pooling Point" is not.

Tennessee, zone 0 (daily and monthly survey)

Deliveries into Tennessee Gas Pipeline's 100 leg from the Mexico-Texas border to the Texas-Louisiana border.

Texas Eastern, E. Texas (daily and monthly survey)

Deliveries into Texas Eastern Transmission on the 24-inch line from the Huntsville, TX, compressor station to the Little Rock station in Arkansas, including the segment from Joaquin to Sharon.

Texas Eastern, S. Texas (daily and monthly survey)

Deliveries into Texas Eastern Transmission on the 30-inch pipeline from the Mexico-Texas border to just upstream of the Vidor, TX, compressor station; and deliveries into Texas Eastern on the 24-inch pipeline from the Hagist Ranch compressor station to just upstream of the Huntsville, TX compressor station.

Transco, zone 1 (daily and monthly survey)

Deliveries into Transcontinental Gas Pipe Line on two 24-inch lines running from South Texas to compressor station 30 in Wharton County, TX, which is Transco's pooling point for gas gathered on the Gulf Central Texas Lateral and for onshore coastal South Texas production.

Transco, zone 2 (daily and monthly survey)

Deliveries into Transcontinental Gas Pipe Line on the 30-inch line downstream of station 30 in Wharton County, TX, to compressor station 45 in Beauregard Parish, LA, the only pooling point in the zone.

Louisiana/Southeast

ANR, La. (daily and monthly survey)

Deliveries into ANR Pipeline along the southeastern Louisiana lateral that starts offshore and runs to the Patterson, LA, compressor station onshore and on to the Eunice, LA station, where ANR's Southeast mainline begins. Also, deliveries into ANR along a second lateral that runs from the HIOS system downstream of West Cameron 167 offshore to the Grand Chenier, LA station onshore and on to the Eunice station, as well as deals done at the Eunice pool.

Columbia Gulf, La. (daily and monthly survey)

Deliveries into Columbia Gulf Transmission on its onshore lateral pipeline system stretching across South Louisiana, upstream

of Rayne, LA. Columbia Gulf's East Lateral extends from Rayne to Venice, LA. The West Lateral runs from Rayne to west of Cameron, LA. Excluded are deals done in the offshore rate zone, at Rayne or elsewhere in the mainline rate zone.

Columbia Gulf, mainline (daily and monthly survey)

Deliveries into Columbia Gulf Transmission anywhere along its mainline system zone in Louisiana and Mississippi. The mainline system extends northeast from Rayne, LA to Leach, KY.

Florida city-gates (daily survey only)

Deliveries from Florida Gas Transmission into all city-gates in the Florida market area, which begins in Santa Rosa County just west of station 12 in the extreme western Florida Panhandle and extends into southern Florida.

Florida Gas, zone 2 (daily and monthly survey)

Deliveries into Florida Gas Transmission downstream of station 7 in Acadia Parish, LA, to station 8 in East Baton Rouge Parish. Included is supply into the mainline from the White Lake Lateral and from the Chacahoula Lateral, both of which extend south from the mainline into production areas.

Florida Gas, zone 3 (daily and monthly survey)

Deliveries into Florida Gas Transmission downstream of compressor station 8 to just upstream of station 12 in Santa Rosa County, FL., the demarcation point with the market area. Includes deliveries between stations 8 and 12, including Mobile Bay deals into Florida Gas.

Henry Hub (daily and monthly survey)

Deliveries into interstate and intrastate pipelines from the outlet of Henry Hub on Sabine Pipe Line in Vermilion Parish, LA. Pipelines include Gulf South Pipeline, Southern Natural Gas, Natural Gas

Pipeline Co. of America, Texas Gas Transmission, Sabine Pipe Line, Columbia Gulf Transmission, Transcontinental Gas Pipe Line, Trunkline Gas, Jefferson Island Pipeline and Acadian Gas.

Southern Natural, La. (daily and monthly survey)

Deliveries into Southern Natural Gas' mainlines anywhere in Louisiana, including an eastern spur starting in Plaquemines Parish and a western spur starting in St. Mary Parish in South Louisiana, and a line that starts at the Texas-Louisiana border in DeSoto Parish and runs to the Louisiana-Mississippi border in East Carroll Parish in northern Louisiana.

Tennessee, La., 500 leg (daily and monthly survey)

Deliveries into Tennessee Gas Pipeline's 500 leg in zone L in southeastern Louisiana, including deliveries into the 500 Leg from the offshore Blue Water Header system. The 500 Leg meets the boundary of Zone 1 at station 534 at Purvis, MS.

Tennessee, La., 800 leg (daily and monthly survey)

Deliveries into Tennessee Gas Pipeline's 800 leg in zone L in southeastern Louisiana, including deliveries from the offshore Blue Water Header system. The leg meets the boundary of the market area at station 834 at Winnsboro in central Louisiana.

Texas Eastern, E. La. (daily and monthly survey)

Deliveries into Texas Eastern Transmission on the 30-inch line from the Opelousas, LA, compressor station to the Kosciusko, MS, compressor station. Included are deliveries into the 30-inch pipeline from Texas Eastern's Venice Line at the New Roads, LA compressor station.

Texas Eastern, W. La. (daily and monthly survey)

Deliveries into Texas Eastern Transmission on the 30-inch line from the Vidor, LA compressor station to just upstream

of the Opelousas, LA compressor station. Includes deliveries from Texas Eastern's offshore Cameron Line at the Gillis, LA compressor station.

Texas Eastern, M-1 30-inch (Kosi) (daily and monthly survey)

Deliveries into Texas Eastern Transmission on the 30-inch line at the Kosciusko, MS compressor station, which is the demarcation point between Texas Eastern's production and market zones. Deliveries into the 24-inch mainline are not included.

Texas Gas, zone SL (daily and monthly survey)

Deliveries into Texas Gas Transmission on two southeastern Louisiana laterals, including offshore segments. The southwest spur begins offshore at Grand Chenier and runs through Cameron Parish to the Eunice compressor station. The southeast spur begins offshore and runs through Terrebonne Parish to Eunice. Zone SL extends to the vicinity where Texas Gas crosses the Red River in Rapides Parish.

Texas Gas, zone 1 (daily and monthly survey)

Deliveries into Texas Gas Transmission starting just south of the Pineville, LA compressor station in Rapides Parish north to Crockett County, TN.

Transco, zone 3 (daily and monthly survey)

Deliveries into Transcontinental Gas Pipe Line on the 30-inch, 36-inch and 42-inch lines downstream of compressor station 45 in Beauregard Parish, LA to station 65 on the Louisiana-Mississippi border in St. Helena Parish, LA. Pooling points in the zone are at stations 50, 62 and 65.

Transco, zone 4 (daily and monthly survey)

Deliveries into Transcontinental Gas Pipe Line on the 30-inch, 36-inch and 42-inch lines downstream of compressor station 65

at the Louisiana-Mississippi border in St. Helena Parish, LA, to the Georgia-South Carolina border. Gas enters the Transco mainline from the Mobile Bay Lateral at station 85 in Butler, AL, the only zone 4 pooling point.

Trunkline, La. (monthly survey only)

Deliveries into Trunkline Gas at points upstream of the Longville compressor station on the lines that do not extend to Texas.

Trunkline, E. La. (daily survey only)

Deliveries into Trunkline Gas on an offshore gathering system running from south of Terrebonne Parish west to the Kaplan station in Vermilion Parish, the boundary with the WLA zone.

Trunkline, W. La. (daily survey only)

Deliveries into Trunkline Gas along two laterals starting at an offshore Louisiana lateral leading to the Kaplan, LA station in Vermilion Parish, northwest to the Longville compressor station. Includes deliveries at the Kaplan compressor station, which demarcates the WLA and ELA zones.

Trunkline, zone 1A (daily and monthly survey)

Deliveries to Trunkline Gas Co. in zone 1A from the discharge side of its Longville, LA, compressor station north to the suction side of its Dyersburg, TN, station, as well as transactions at Trunkline's zone 1A pool.

Rockies/Northwest

Cheyenne Hub (daily and monthly survey)

Deliveries into Trailblazer Pipeline, Public Service Co. of Colorado and Colorado Interstate Gas in the vicinity of the Cheyenne Hub in northeast Colorado.

CIG, Rocky Mountains (daily and monthly survey)

Deliveries into Colorado Interstate Gas' 20-inch, 22-inch and 24-inch mainlines in Wyoming and Colorado. Also included are deliveries into the Parachute to Natural Buttes segment in Uintah County, Utah, and deliveries into CIG's 16-inch lateral running from the Rawlins station in Carbon County, WY to the Elk Basin station in Park County, WY. Not included are deliveries into CIG's system at points south of Cheyenne, WY.

GTN, Kingsgate (daily survey only)

Deliveries into Gas Transmission Northwest from Foothills Pipeline at the Kingsgate interconnection at the US-Canadian border in Boundary County, ID. The system was previously known as PG&E Gas Transmission, Northwest.

Kern River/Opal plant (daily survey only)

Deliveries into Kern River Gas Transmission at the Opal, WY, processing plant and Muddy Creek compressor station in southwestern Wyoming where Kern River interconnects with Northwest Pipeline, Questar Pipeline and Colorado Interstate Gas. Gas traded at the Opal plant that isn't nominated into a specific pipeline is included in the daily Kern River-Opal plant pricing point.

Kern River, Wyoming (monthly survey only)

Deliveries into Kern River Gas Transmission anywhere in Wyoming. Transactions done at Opal, WY and the Muddy Creek compressor station, where Kern River interconnects with Northwest Pipeline, Questar Pipeline and Colorado Interstate Gas, are used in both the Kern River, Wyoming, and Northwest Pipeline, Rocky Mountain, monthly postings because gas traded at those points often isn't for nomination into a specific pipeline.

Northwest, Canadian border (Sumas) (daily and monthly survey)

Deliveries into Northwest Pipeline from Westcoast Energy at the Sumas, WA.-Huntington, British Columbia, interconnection at the US-Canadian border.

Northwest, S. of Green River (daily survey only)

Deliveries into Northwest Pipeline from the Green River, WY compressor station south to the La Plata interconnection with El Paso Natural Gas in the San Juan Basin in La Plata County, CO. Included are deliveries from Clay Basin storage, the Piceance Basin and the Ignacio plant.

Northwest, Wyoming pool (daily survey only)

Deliveries into Northwest Pipeline from the Green River, WY compressor station to the Kemmerer, WY station. Included are deliveries at the Opal, WY plant as well as at the Painter, Anschutz, Muddy Creek, Granger, Shute Creek and Whitney stations.

Northwest, Rocky Mountains (monthly survey only)

Deliveries into Northwest Pipeline's mainline in Wyoming, Utah and Colorado between the Kemmerer and Moab stations. Deliveries at Ignacio, CO and elsewhere in zone MO are excluded. Transactions done at Opal, WY, and the Muddy Creek compressor station, where Northwest interconnects with Kern River Gas Transmission, Questar Pipeline and Colorado Interstate Gas, are used in both the Kern River, Wyoming, and Northwest Pipeline, Rocky Mountain monthly postings because gas traded at those points often isn't for nomination into a specific pipeline.

PG&E, Malin (daily and monthly survey)

Deliveries into Pacific Gas and Electric's Lines 400 and 401 at the Oregon-California border at Malin, OR. This location includes

deliveries from Gas Transmission Northwest and Ruby Pipeline.

Questar, Rocky Mountains (daily survey only)

Deliveries into Questar Pipeline on its North system, which runs from northwestern Colorado through southern Wyoming to Salt Lake City, and on its South system, which runs from western Colorado to Payson, Utah, east of the Fidler compressor station. A 20-inch line running parallel to the Utah-Colorado border connects the two systems. This point was discontinued in the monthly survey effective May 1, 2014. It continues to be published in the daily survey.

Stanfield, Ore. (daily survey only)

Deliveries into Northwest Pipeline from Gas Transmission Northwest at the Stanfield compressor station in Umatilla County, OR on the Oregon-Washington border. This point was discontinued in the monthly survey effective Jan. 1, 2012. It continues to be published in the daily survey.

TCPL Alberta, AECO-C (daily and monthly survey)

Deliveries into TransCanada's Alberta System at the AECO-C, NIT Hub in southeastern Alberta. AECO-C is the principal storage facility and hub on TCPL Alberta; paying the rate for NIT service, or Nova Inventory Transfer, will cover transmission for delivery of gas to AECO-C and most other points. The monthly bidweek posting is composed of fixed-price deals only. The price is reported in Canadian dollars per gigajoule.

TCPL Alberta, AECO-C Physical Basis (monthly survey only)

Deliveries on TransCanada's Alberta System at the AECO-C, NIT Hub in southeastern Alberta. Posting is composed of physical basis deals in which the basis value is negotiated on one of the first three days of bidweek and the price is set by the final closing value of the near-month NYMEX futures contract plus or minus the negotiated basis. AECO-C is the

principal storage facility and hub on TCPL Alberta; paying the rate for NIT service, or Nova Inventory Transfer, will cover transmission for delivery of gas to AECO-C and most other points. The price is reported in US dollars per MMBtu.

Westcoast, station 2 (daily and monthly survey)

Deliveries into Westcoast Energy at compressor station 2 in north-central British Columbia. The price is reported in Canadian dollars per gigajoule. This point was added to the monthly bidweek survey effective for December 2013 delivery.

White River Hub (daily survey only)

Deliveries to or from pools or interconnects that make up the White River Hub in Rio Blanco County, Colorado.

Southwest

El Paso, Bondad (daily survey only)

Deliveries into El Paso Natural Gas at the Bondad compressor station in the San Juan Basin. Bondad is located in the northern part of the San Juan Basin in La Plata County, CO, south of the Ignacio plant on Northwest Pipeline and north of the Blanco plant on El Paso.

El Paso, Permian Basin (daily and monthly survey)

Deliveries into El Paso Natural Gas in the Permian Basin from three pools: the Waha plant south (Waha pool), the Keystone station south to Waha (Keystone pool) and the Plains station south to Keystone (Plains pool).

El Paso, San Juan Basin (daily and monthly survey)

Deliveries into El Paso Natural Gas south of the Bondad compressor station in the San Juan Basin, including gas from the Blanco, Chaco,

Rio Vista, Milagro and Valverde plants in New Mexico.

El Paso, South Mainline (daily survey only)

Deliveries on El Paso's south mainline at points between Cornudas station in West Texas to but not including Ehrenberg, AZ.

Kern River, delivered (daily survey only)

Deliveries from Kern River Gas Transmission upstream of the Southern California Gas system in the Las Vegas, NV, area; excluded are deliveries at Wheeler Ridge, Kramer Junction and Daggett.

PG&E, city-gate (daily and monthly survey)

Deliveries from Pacific Gas and Electric's intrastate transmission system to city-gates on PG&E's local distribution system in Northern California.

PG&E, South (daily and monthly survey)

Deliveries into Pacific Gas and Electric in Southern California from El Paso Natural Gas and Transwestern Pipeline at Topock, CA; from Kern River Gas Transmission at Daggett, CA, and the High Desert Lateral; from Southern California Gas at the Kern River station; and from Questar Southern Trails Pipeline at Essex, CA.

SoCal Gas (daily and monthly survey)

Deliveries into Southern California Gas from El Paso Natural Gas at Topock, CA, and Blythe, CA (Ehrenberg, AZ); from Transwestern Pipeline at Topock-Needles, CA; from Kern River Gas Transmission at Wheeler Ridge and Kramer Junction, CA; and from Questar Southern Trails Pipeline at Needles. The point also includes deliveries from Pacific Gas and Electric at several points, including Kern River station and Pismo-Daggett; and in-state production.

SoCal Gas, city-gate (daily and monthly survey)

Deliveries at Southern California Gas' city-gate pool. The SoCal Gas city-gate pool is a "virtual" trading location on SoCal Gas' system for deliveries to and from holders of the distributor's city-gate pool contracts. This point includes storage transactions delivered to and from the city-gate pool.

Transwestern, Permian Basin (daily and monthly survey)

Deliveries into Transwestern Pipeline from the West Texas zone located southeast and southwest of the WT-1 compressor station in Lea County, NM and the Central zone bordered by station 8 in Lincoln County, NM, to the northwest, station P-1 in Roosevelt County, NM, to the east and station WT-1 in Eddy County, NM to the south.

Transwestern, San Juan Basin (daily and monthly survey)

Deliveries to Transwestern Pipeline at points included in Transwestern's Blanco Hub in San Juan County, NM.

Waha (daily and monthly survey)

Deliveries into interstate and intrastate pipelines at the outlet of the Waha header system and in the Waha vicinity in the Permian Basin in West Texas. Pipelines include El Paso Natural Gas, Transwestern Pipeline, Natural Gas Pipeline Co. of America, Northern Natural Gas, Delhi Pipeline, Oasis Pipeline, and Enterprise Texas Pipeline.

REVISION HISTORY

December 2017: On December 1, Platts changed final monthly indices for Platts locations methodology to add non-Platts price reporter ICE trades. Corrected symbol for Platts location Rex, zone 3 delivered final daily indices by flow date absolute range symbol.

November 2017: Platts discontinued regional average preliminary fixed price monthly symbols on November 17. Only regional average final monthly index prices will be published.

October 2017: On trade date October 31, 2017, changed final daily indices for Platts locations methodology to add non-Platts price reporter ICE trades and editorial judgment to assess daily prices. Added daily and monthly indices for ICE Algonquin, Millennium-Ramapo receipts, ICE Algonquin, TGP-Mahwah receipts, and ICE ETC, Cleburne locations.

September 2017: Launched preliminary monthly indices for Platts and ICE locations on September 25, 2017 and final monthly indices for ICE locations on October 1, 2017.

August 2017: Platts amended text throughout to reflect implementation of Platts ICE natural gas agreement. Launched preliminary daily indices for Platts locations and final daily indices for ICE locations on August 31, 2017.

June 2017: Platts completed an annual update to the North American Natural Gas methodology guide. In this update, Platts reviewed all content and made minor edits throughout.

January 2017: Added ICE physical bids and offers to market information used to assess monthly indices

August 2016: Platts completed an annual update to the North American Natural Gas methodology guide in August 2016. In this update, Platts reviewed all content. In this edition, Platts made minor edits throughout.

June 2016: Added Transco, zone 5 delivered North (daily survey only) and Transco, zone 5 delivered South (daily and monthly surveys) sublistings. Discontinued use of backup Yahoo mailboxes and replaced them with gasprice_daily2@spglobal.com and gasprice_monthly2@spglobal.com.

April 2016: Extended reportable transaction time cutoff to 1 pm Central from 11:30 am, effective April 1, 2016. Added detail on calculations of regional and national average prices.

January 2016: Added regional average symbols for the 8 regions.

December 2015: Reorganized locations by 8 separate regions.

October 2015: Added Chicago-Nicor, Chicago-NIPSCO, Chicago-Peoples, and REX, Zone 3 delivered to daily and monthly surveys.

August 2015: Added Tennessee, Zone 4-313 Pool and Transco, Zone 6 non-NY South locations to daily and monthly surveys. Also edited Part I, Part II, and Part III at beginning of document.

June 2015: Section on common and absolute ranges changed to show ranges are carried out to a third decimal place and rounded to the nearest half-cent.

April 2015: Clarification of descriptions at Algonquin, city-gates; Dominion, North Point; Dominion, South Point; Texas Eastern, M-3; and Chicago city-gates.

February 2015: Clarification of Corrections and Security and Confidentiality sections.

January 2015: Added “monthly survey” to Transco Zone 5 delivered point description.

December 2014: Added Transco Zone 5 delivered to monthly survey. Added Transco Zone 6 non-NY North and Columbia Gas, Appalachia (Non-IPP) to the daily and monthly surveys. The monthly survey additions are effective December 2014 trading

for January 2015 delivery. The daily survey additions are effective trade date January 2, 2015 for delivery on January 3 – 5.

November 2014: Clarified description for Columbia Gas, Appalachia (daily and monthly survey), confirming it reflects deliveries in Columbia Gas Transmission’s Interruptible Paper Pool (IPP pool) from any source on Columbia Gas. Deliveries in the IPP pool, which is also known as the “TCO Pool” can originate from any source delivered into Columbia Gas’ system.

October 2014: Updates description for Columbia Gas, Appalachia (daily survey only) confirming it reflects deliveries into Columbia Gas Transmission’s Interruptible Paper Pool (IPP pool) from any source on Columbia Gas. Deliveries into the IPP pool are transported using Columbia Gas Transmission’s IPP Rate schedule and can originate from any source delivered into Columbia Gas’ system, including unrestricted aggregation points under the pipeline’s AS rate schedule.

May 2014: Discontinued Questar Gas Co. pricing location for monthly bidweek survey only.

April 2014: Correction of description for Tennessee, La., 500 leg.

April 2014: Modification of description for Tennessee, zone 6 delivered, confining it to the deliveries off the 200 leg. Addition of Tennessee, zone 6 (300 leg) pricing location to the daily survey.

January 2014: Platts revamped this Methodology and Specifications Guide effective January 2014. This revamp was completed to enhance the clarity and usefulness of the guide and to introduce greater consistency of layout and structure across Platts’ published methodology guides. Methodologies for market coverage were not changed in this version. Platts symbols for all pricing locations were added in Part VII and the order of pricing location listings was revised to group them by six geographical regions.

November 2013: Added WestCoast Energy, station 2, to monthly

bidweek survey effective bidweek trading November 2013 for December 2013 delivery. Changed name of CenterPoint Energy Gas Transmission to Enable Gas Transmission. (In the daily price tables, the CenterPoint, East” listing was changed to “Enable Gas, East,” effective trade date November 25, 2013, and in the monthly bidweek tables “CenterPoint Energy Gas Transmission Co., East” was changed to “Enable Gas Transmission, LLC., East” effective bidweek trading November 2013 for delivery December 2013.)

July 2013: Clarification of methodology for Western Canadian daily price indexes Westcoast, station 2, and NW, Can. Bdr. (Sumas) for Canadian holidays that fall on Mondays.

April 2013: Additions of Transcontinental Gas Pipe Line, Leidy Line receipts and Tennessee Gas Pipeline, Zone 4-200 leg pricing locations to the daily and monthly bidweek surveys.

January 2013: Modification of description for Niagara pricing location to reflect US exports to Canada as well as US imports from Canada.

October 2012: Additions of Texas Eastern M-2, receipts and Millennium Pipeline, East receipts to the daily and monthly bidweek surveys.

January 2012: (second update in January 2012): Addition of

Tennessee, zone 4-300 leg to the daily survey and the monthly bidweek survey.

January 2012: Discontinuation of three pricing locations: Natural Gas Pipeline Co. of America, Louisiana, in the daily and monthly bidweek surveys; Stingray Pool in the daily survey; and Stanfield, Ore., in the monthly bidweek survey only. (The Stanfield, Ore., location continues in the daily survey.) The changes became effective January 1, 2012. Additionally, language was added to the PG&E, Malin location description to make explicit that the location includes deliveries from Gas Transmission Northwest and Ruby Pipeline.
